

# WinCap e-commerce Solutions

## On-Line Shopping and Electronic Ordering

On-Line Shopping & Electronic Ordering is the *WinCap* feature that allows users to directly link to vendor web-based ordering systems through the Requisition/PO form. The user is taken to the vendor's website and is seamlessly logged-in using the district's pertinent account information. The applicable district pricing plan is presented to your users. After browsing and selecting the desired items on the vendor's website, the user's request to "checkout" or "submit order" will actually copy the items from their shopping cart into the *WinCap* requisition. These requisitions then move through the same approval process as for any other *WinCap* pending purchase order. These orders are internally tagged as electronic orders (e-orders) so that once they are issued they are electronically transmitted to the vendor via the web when the district chooses to "print" the original order.

- Available for both *WinCap* and *WinCap*WEB-Initiated Orders
- Our current e-commerce vendor partners include:

Featuring these Affiliated Brands:

Capital Computer Associates is continually working with vendors suggested by our users to get them approved for *WinCap* Online Shopping

Cost involves a one-time license fee and an annual maintenance fee based on district enrollment
